Healthy Eating for Preschoolers

Healthy eating is important at every age. Offer preschoolers a variety of fruits, vegetables, grains, protein foods, and dairy or fortified soy alternatives. When deciding on foods and beverages, choose options that are full of nutrients and limited in added sugars, saturated fat, and sodium. Start with these tips:

Model healthy behaviors

Preschoolers tend to copy what parents or caregivers do at the table. If you eat your veggies, they'll eat their veggies. And, it's good for both of you.

Think about their drinks

Sugar-sweetened beverages like sodas and fruit drinks are sources of added sugars that are often high in calories. Beverages with no added sugars like water, unsweetened fat-free or low-fat milk (including low-lactose or lactose-free options), or fortified soy beverages should be the primary choice for children.

Prevent choking

Encourage children to sit at a table for meals and snacks and not wander around carrying food. Check out the [USDA Team Nutrition worksheet](#) for foods that are choking hazards at different ages.

Try new foods

Let children choose a new food to try at the grocery store. Serve something your child likes along with the new food. It may take up to a dozen tries for a child to accept a new food.

Get kids involved

Preschoolers can help at mealtimes by washing produce, tearing lettuce, stirring mixes, scooping ingredients, or setting the table.

Offer choices

Like adults, preschoolers like to have a say in what they eat. "A pear or an apple?" "Whole-wheat toast or some crackers?" You offer the healthy options, but they get to choose.
